

# Stream Box S2 Ultra:

## Tidal/Qobuz 1.069 Important Note

Currently, Stream Box S2 Ultra users are experiencing issues with different streaming services, like Qobuz, Tidal and some webradio stations. This issue is caused by an expired certificate that provides encrypted communication over the internet. You might be aware of it, since this issue affected a vast number of other services and different (3rd party) devices.

The new update is currently being tested by us internally and released to the public immediately after. Please check updates regularly by going to Settings -> System -> System Updates and press Check Updates.
